

Mitigating our Impact on the Environment

In 2019, Kirby transported 458.7 million barrels of cargo without a spill to water

- At Kirby, no spill is too small - all cargo spills, even if only 1 drop, are recorded and reported
- Cargo spills to water have declined to 0.15 incidents per 1,000 cargo transfers – representing an 80% decrease since 2002
- Kirby is committed to continuous improvement through cargo transfer audits, regular tankerman proficiency evaluations, advanced training courses, review and implementation of best practices, review of near-miss events, and quarterly tankerman meetings
- In 2019, more than 4,900 cargo transfer audits were completed, representing 11% of all cargo transfers

* Incident rates of cargo spills per 1,000 transfers
