High Water Designations					
In West Virginia, High Water fleeting rates will go into effect when the South Side Bridge on the Kanawha River water level reaches 11'.					
HIGH WATER - When the Baton Rouge gauge reaches 28' (High Water status) there will be a 33 1/3% surcharge on all rates on the LMR due to a reduction of tow sizes and fleeting capacity as per the Mississippi River Crisis Action Plan.					
**EXTREME HIGH WATER - When the Carrollton gauge reaches 12' (Extreme High Water) an additional surcharge will be added to all In/Out charges for all LMR fleets, which is a result of the additional HP requirements as mandated by the USCG in 33 CFR § 165.803.					
**Extreme High Water Surcharge					\$200
